

# KTeam-offshore software development team

KTeam is a specialized formation of kloia engineers that bring the modern best practices to your projects. kloia's experts in DevOps, software development and testing help you deliver your projects on time, within budget, with high quality.

*"kloia's advanced knowledge of DevOps best practices, coupled with their expert .NET skills helped us modernize a core part of our application, delivering a best in class solution that enables us to build and deliver changes to our customers with a far greater velocity."*

**JOSH HART**

Cloud Architect, @Epos Now

*"The kloia KTeam team exceeded our expectations with world-class engineers to modernize test automation projects, software development and CI/CD pipelines. Their expertise in DevOps, software development and testing has always been very helpful and beneficial in moving us forward. I am always positive about cooperation with kloia KTeam."*

**ENRICO SEMRAU**

Principal Engineer in Operations, @Moonfare

## Customers innovating with us

## What is KTeam?

**KTeam is an offshore software development team solution that gives immediate access to trusted resources for your project needs.** You can concentrate on getting things done without having to worry about recruiting, retention, or turnover. The size of your KTeam may be adjusted in order to meet those needs.

Each KTeam is orchestrated by a senior kloia consultant in a delivery manager role. They are responsible for ensuring efficient delivery and high quality throughout the project. Here is what delivery managers do in kloia:

- ✓ Getting started with the team
- ✓ Managing the cadence of work
- ✓ Establishing the quality standards
- ✓ Doing architectural reviews
- ✓ Delivering tech talks / awareness sessions for executives
- ✓ Suggesting workflow improvements

## Who is on the KTeam?

Software Engineers

DevOps Engineers

DevSecOps Experts

Test Automation Engineers

Senior kloia Consultants  
in Lead Roles

## What are the benefits of a KTeam?

- ✓ Day-1 technological competence and development
- ✓ There is no need for onboarding/offboarding procedures.
- ✓ There are no recruiting procedures.
- ✓ There are no concerns about turnover.
- ✓ Supporting for the architectural decisions and workflows

## Highlights
